

Recently, there have been significant advances in the fields of high-enthalpy hypersonic flows, high-temperature gas physics, and chemistry shock propagation in various media, industrial and medical applications of shock waves, and shock-tube technology. This series contains all the papers and lectures of the 19th International Symposium on Shock Waves held in Marseille in 1993. They will be published in four topical volumes, each containing papers on related topics, and preceded by an overview written by a leading international expert. The volumes may be purchased independently.

C'est bon, facile et pas cher ! découvrez 51 recettes à moins de 2 euros, prêtes en 15 minutes. (French Edition), Atlas: Greetings From Earth: Childrens Book (Atlas (Bluewater)), Rapunzel (Read-It! Readers: Fairy Tales), Serial Monogamy: Soap Opera, Lifespan, and the Gendered Politics of Fantasy (Hampton Press Communication Series), Geometric Perturbation Theory In Physics, Drugs and the Delivery of Oxygen to Tissues,
