

The Dowsing (fortune-telling pendulum, L rods) and the O ring had been assumed to be the living body un-science phenomena that are impossible to verify so far because of the operations under the complex conditions. The O ring test is executed partially of the medical world as the method of diagnosing a living body that obtains the intellectual property right of the United States. However, the hidden mechanism based on the diagnosis has not been still clarified enough. The living body un-science phenomena (rotation operation of the fortune-telling pendulum, the swinging operation of the L rods and the opening and closing operation of O ring) related to the dowsing, O ring can be verified to detect in the “Consciousness cognitive science” according to the “External Qi force - gravity conversion theory” unifying the “External Qi force” and Newtons mechanics. When the “Ion ratio inside body (Qi) detector” (Patent pending, Qitector®) is used, it can be detected clearly than the O ring. As a result, it can be clarified the ideal way of the “Ion ratio inside body (Qi) detector” to detect each state of the living body, the environment and consciousness looking straight more.
