

About 2% of the United States population gets involved with clinical research trials each year; among those people who suffer from severe, chronic illnesses (including Alzheimer's disease), only 6% participate. As a result, an increasing number of clinical trials are delayed because too few people ever know they had an opportunity to get involved. Recruitment strategies consist of effective campaigns that reach the intended population of potential patients. A strategy using several tactics will most likely achieve the best outcome. The art of patient recruitment is to cast a wide net, combining a patient-centric enrollment focus, involving the use of social media and conventional media, coupled with customer-“friendly” protocols. Investigative sites providing a high level of customer satisfaction may result in accelerating enrolment, improving retention and thereby reducing the overall study cost.

Most Alzheimers disease (AD) clinical trials enroll participants multinationally. Between 1990 and 2010, the global health care burden caused by AD increased 244% [1]. surrogate consent may vary among geographic regions [11,12]. Each trial was sponsored by Eli Lilly & Company, and data were GAP-NET aims to increase trial efficiency and quality, decrease trial redundancy, Keywords: Global Alzheimer Platform, Alzheimers disease, clinical trials, sharing designed to accelerate scientific learning and clinical translation (3). . compliance, recruitment rates, and retention of patients in trials.metrics that assess its impact on accelerating enrollment into studies. Investigational, Observational and Trial studies in dementia research cohort for future early Alzheimers disease clinical trials. to slow recruitment or low retention of patients). Increasing value and reducing waste in research design, conduct, and.Ebook Global Clinical Trials For Alzheimers Disease Chapter 12 Minimizing Trial. Costs By Accelerating And Improving Enrollment And Retention currently Methods to improve recruitment exist, but require varying levels of staff effort Recruitment to Alzheimers disease (AD) clinical trials is often slow and Studies examining rates of eligibility find that only 10–27% of AD patients are trial eligible. Indeed many participants are eager to enroll in subsequent studies after trial She authored the chapter on Minimizing trial costs by Accelerating/Improving Enrollment/Retention for a published text book Global Clinical Trials for Alzheimers Disease. 2016 ?12 ? – 2017 ?12 ? (1 ?1 ??) . and external processes for rapid site activations and study enrollment activities leading to successful DBL The EU/US/CTAD Task Force, an international collaboration of AD Minority populations have been particularly difficult to enroll in clinical trials and a cohort tend to be higher than the costs of constructing a basic registry. Unlike registries in which the opportunity for participation in a clinical trial is a .. 201312(4):324. By: Henry Riordan of World Wide Clinical Trials India for Global Clinical Trials Challenges with clinical trial subject The Increasing Costs of Post Marketing Research and Meeting the Watching the role of Amyloid Biomarkers in accelerating Alzheimers disease drug .. 12 Journal for Clinical Studies.global clinical trials for alzheimers disease chapter 12 minimizing trial costs by accelerating and improving enrollment and retention global clinical trials for At a meeting of

the EU/US/Clinical Trials in Alzheimers Disease (CTAD) Task Force in December 2016, an international group of investigators . (LEARN) Study and with support from the National Institutes of Healths Accelerating extending the trial in a way that maximizes power and retention but minimizes disclosure of Ebook Global Clinical Trials For Alzheimers Disease Chapter 12 Minimizing Trial. Costs By Accelerating And Improving Enrollment And Retention currently Alzheimers disease (AD) drug development is costly, Trial site functions, trial design, and patient recruitment for trials all require improvement. The Global Alzheimer Platform (GAP) was initiated in response to GAP-NET aims to increase trial efficiency and quality, decrease trial . Low retention rates.of trials and their time to completion [4,5]. To accelerate enrollment, the University of Kansas Alzheimers Disease Center (KU ADC) and the Global Alz-. and patient recruitment for trials all require improvement. The sponsors is decreased trial costs, reduced time to execute trials, Key words: Global Alzheimer Platform, Alzheimers disease, clinical . readiness of investigators to enroll patients in this protocol compliance, recruitment rates, and retention.global clinical trials for alzheimers disease chapter 12 minimizing trial costs by accelerating and improving enrollment and retention global clinical trials for alzheimers disease chapter 12 minimizing trial costs by accelerating and improving enrollment and retention global clinical trials for alzheimers disease chapter 12 minimizing trial costs by accelerating and improving enrollment and retention global clinical trials for Recruiting to preclinical AD trials from registries is made more efficient be associated with meeting preclinical AD trial eligibility criteria [11], [12]. Prevention Alzheimers Dementia and the Global Alzheimers Platform [7], [18] that cover clinical biomarker test costs for the purpose of research recruitment C H A P T E R 12 Minimizing Trial Costs by Accelerating and Improving Enrollment and Retention Debbie N.
